## System Overview

AJCE NSS is a project which will enable the educational institute to organize the overall NSS Unit activities in a centralized manner. This system enable the program officer/volunteer secretary to control the NSS Unit remotely via online system.

### Main modules

- volunteer
- Admin
- Program officer
- Volunteer secretary

### Existing system

In the existing system all nss activities done manually. Current system which is completely manual which will require more human effort to organize the unit activities. It is a time consuming process a volunteer needs to work on the NSS office which will impact their study time. Record may be lost.

### Proposed system

In the proposed system all data is maintained by in the database. It is easy and save retrieve all data handled in an NSS Unit. It completely an automated system. It save time, reduce human effort, provide security.

## Modules
